

Integrated PSM Planning

Scaling up iCCM, session III
Nairobi, 17 February

What do we mean by 'PSM Integration'?

- **Programme dimension** – How do we get commodities needed for specific programme objectives **efficiently** to the end users?
- **Systemic dimension** – How do we strengthen the overall PSM system to **effectively** handling of all essential commodities?

Stepping up PSM for iCCM

- Good sense of the 'what'
- Some challenges with the 'how'

The comprehensive / systemic integration challenge

The dissemination challenge

		Average Rating	National EML	National treatment guidelines	Registered in-country	Prescription authority	Tracked in eLMIS	No national stock-outs	Stock available at Point-of-Service [B]	Training curricula (national)	Recent training at Facilities [B]	Job aids or check lists [B]	Job aids / check list (national)	Policy against user fees	Service Utilization routinely tracked	Coverage rate [B]
Average Rating:		3.8	5.0	4.1	4.8	4.7	5.0	3.7	3.0	3.0	2.2	3.5		5.0	1.9	2.3
Reproductive	Female Condom	3.6	5	3	n/a	5	5	5		1	2	3		5	5	1

	Zinc	4.1	5	5	5	5	5	1		5	3	5		5	1	

Key messages for group work

Keep attention to the tool recap, existing data and lessons learned from other countries

Keep in mind the broader PSM context when implementing PSM for iCCM
