

Multi-country results dissemination meeting

Rapid Access Expansion Programme

24-27 October 2017

Global **Malaria** Programme

World Health
Organization

WHO Global Malaria Programme, funded by Global Affairs Canada, from April 2012 - June 2018 to:

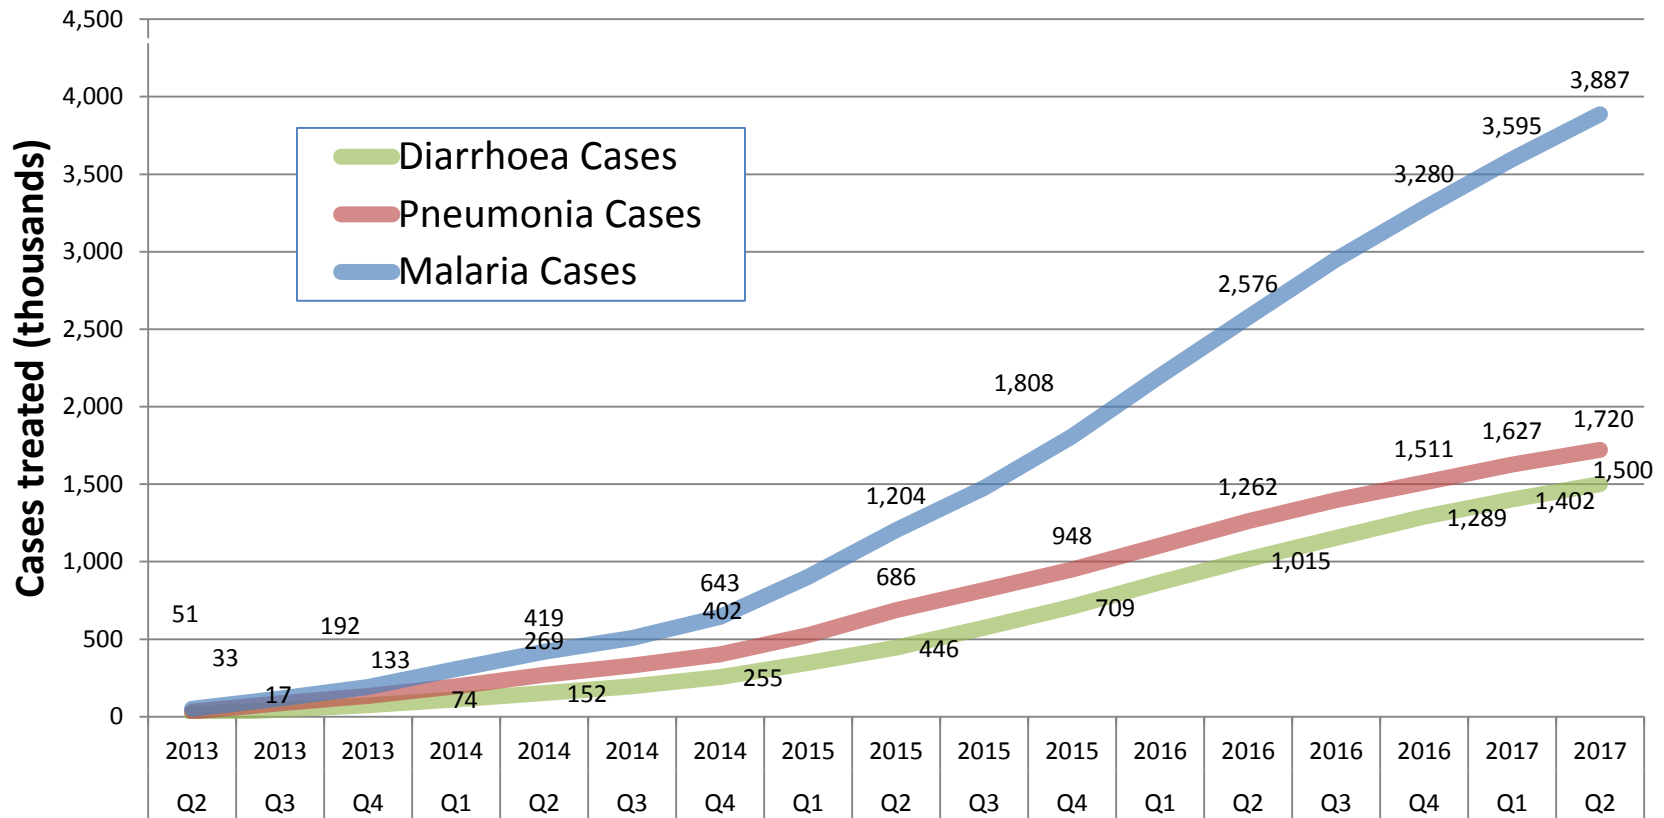

1. Contribute to the reduction of child mortality by increasing access to treatment for common childhood illnesses in five African countries; and
2. Stimulate policy updates and catalyze scale-up of integrated Community Case Management (iCCM).

Over 7.1 million cases treated

Access to malaria (RDTs, ACT), pneumonia (ARI timers, amoxicillin), and diarrhoea (ORS, zinc) case management extended to 1.5 million children

To share the evidence generated by the RAcE Programme to help countries to scale-up high-quality iCCM in order to reduce child mortality.

Specific objectives:

1. To share iCCM ***implementation experience***, **household survey and final evaluation results** that will inform and influence national policies and programmes in the RAcE-supported countries and beyond.
2. To share **iCCM sustainability roadmap** development initiative and results of **operational research** and **best practices** from RAcE-supported countries.
