Digital Health and Innovations Subgroup Meeting
November 1, 2018

Participants: Steve Ollis, Jeanne Koepsell, Gabriela Berenstein, Sarah Romorini (abt), Dyness Kasungami, Dominique Laura Freire, Thomas O'Connell, Valerie Dacremont, Jodi Lis (Jhpiego).

Webinar recording link: https://register.gotowebinar.com/recording/5062246486886561281

Meeting Notes:
- Terms of Reference
    - After discussion, terms of reference were finalized. Key points of discussion:
        - What should be the goal? Should it be measurable (not necessarily)
        - One approach could be to focus on objectives and have an overarching goal.
        - This subgroup should work through partnership with other groups:
        - Present at health focused conferences.
        - Present from child health perspective at digital health conferences and ICT4D
        - Feed back via webinars and newsletter to the overall group.
- The Task Force has a new newsletter, starting in December. A KM consultant (Suzanne) is overseeing it. We will engage initially for two purposes:
    - For December, look at what we're looking forward to at the Global Digital Health Forum (GDHF)
    - For January, look for something more substantive.
- We will also prepare a webinar for later in January with key points from the GDHF including highlighting digital health innovations.
- The current mailing list was shared with the participants. It was noted that there are not many participants from countries outside the US and Europe. Countries that were suggested, and people taking responsibility to nominate members, were as follows:

Country	Person responsible
Bangladesh	Jeanne
Kenya	Jeanne
Tanzania	Steve
Ethiopia	Steve

Malawi	Dyness
Nigeria	Abt
South Africa	Abt, HealthEnabled
DRC	Dyness
Burkina Faso	Steve
Pakistan	Aga Khan
LAC?	Steve (Carlos Slim, IDB for ideas)

- Introduction of new website
  - Showed the structure of the new website - very pretty!! The website is being developed in phases. Content still needs to be developed for both the DH and Innovations page, and the resources related to digital health.   CCM central resources are being sorted through to have updated.   There will be a section for meeting notes and another for resources. There will be social media platforms for DH - the idea is to drive traffic to the site.
  - Suggestions:
    - Include twitter and other social media links.
    - Add section for links to other websites, such as GSMA, mHealth Compendium, Orb, Principles for Digital Development.
- Next steps (by December 1)

Send list of potential participants to Steve / Jeanne	All on list above
Send a blurb for December newsletter mentioning the Forum	Steve
Send ideas for webinar in January	All
Send ideas for Communities of Practice page and the Digital Health page for website	All

Talk with Implementation Science team about how to add innovations to this group	Steve / Jeanne
Set up meeting for early January to prep for January webinar	Steve / Jeanne
Set up F2F meeting at GDHF - send invite to both this participant list and to GDHF participant list.	Jeanne / Steve
Look for your name in the member list (see TOR or link above)- correct anything that is wrong on it	All
