

# PMI Support for iCCM

WHO Technical Consultation:  
Institutionalizing iCCM to End  
Preventable Childhood Deaths

Addis Ababa, Ethiopia

22-26 July 2019

# Why PMI Supports iCCM

- Community case management of malaria can reduce:
  - Overall <5 mortality by 40%
  - Malaria-specific <5 mortality by 60%
  - Severe malaria morbidity by 53%
- CHWs demonstrate high ability to:
  - Safely use RDTs
  - Adhere to results
  - Properly prescribe ACTs
- *Integrated* CCM (iCCM)- has been found to improve the use of CHW services & increase quality of care

# Where PMI Supports iCCM: Advancing Implementation Scale-up

## **FY2007**

- 2 countries
- \$2 million (excluding commodities)

## **FY2017**

- 23 countries (TZ in discussion phase)
- \$20 million (excluding commodities)

Source: PMI Malaria Operational Plans

# How PMI Supports iCCM Scale-up

- Fund integrated platform costs
  - Integrated trainings
  - Supplies/equipment (med kits, registers, etc)
  - Supervision visits
- Fund malaria commodities
- Participation in global iCCM discussions
- PMI cannot provide:
  - Non-malaria commodities
  - CHW salary support

# Challenges

- Increasing demands on CHWs
  - More interventions (SMC, LLINs, HIV, TB, FP, etc)
- Programs not fully supported
  - Inconsistent supply chain
  - Irregular/no supervision
  - Insufficient country funds to expand or pay CHW incentives per country policies
- Monitoring progress of CHW programs
  - Limited community surveillance data
- Consistent funding for all (malaria and non-malaria) commodities

# Additional PMI Support

- CHW inventory
- Operational research
- Improving community surveillance
- CHW toolkit for integrated SBC interventions
