

Digital Health and Innovations Subgroup

Terms of Reference

January 2024

www.childhealthtaskforce.org

Roles and Responsibilities

1. Define specific objectives, tasks and deliverables for the Digital Health and Innovations subgroup in relation to the broader Task Force Terms of Reference
2. Provide technical leadership and advocate for innovation and digital applications that will advance child health programs
3. Identify best practices in digital health and innovations

Goal

Improved consensus of established and emerging digital health and other innovative approaches to support child health.

Objectives

1. Contribute to central Child Health Task Force resource hub with child health innovations and digital health resources
2. Advocate for appropriate use of innovations and digital health tools in child health programs
3. Advocate for the [Principles for Digital Development](#) and other global best practices to minimize fragmentation and encourage re-use, adaptation, and collaboration, and to enable a continuum of care.

Expected Results

Improved knowledge of digital health tools among child health practitioners through:

- Webinars held, highlighting digital tools and innovations
- Session presentations at CORE Group and other child health and digital health conferences

Leadership

The subgroup has two co-chairs: Matt Saaks (Pathfinder) and Jeanne Koepsell (Save the Children).

Membership

306 members as of February 8, 2022.

Meeting Schedule

Bi-monthly (as agreed by team members).
